

10 LETHAL QUESTION - The Conspiracy Brief

Contributed by Omar H. Cinballan
Thursday, 12 January 2006

Warning: The pursuit and verification of the answers to the following 10 questions have gotten more people in trouble than you would like to believe. This is merely a fact. It is definitely not meant to scare the reader from pursuing the truth or passing this vital memo on to the media, politicians and your personal friends. In fact we urge you to do just that. It is your personal responsibility to see that these data become widely known.

It is definitely not meant to scare the reader from pursuing the truth or passing this vital memo on to the media, politicians and your personal friends. In fact we urge you to do just that. It is your personal responsibility to see that these data become widely known.

{bot_wrgoogle}Question one: To whom are the nations of the world owing money? All countries seem to have accumulated major debts.

Answer one: Only a minor part of the debt is owed to the countries internal populations via bonds. The majority is owed to international banks.

Q two: Who controls the majority of the international banks?

A two: Basically only two families: The "Rockefeller family" (USA) and the "Rothschild family" (Europe).

Q three: What control factor does this give these families?

A three: Global economic control.

Q four: How did the countries of the world fall into debt?

A four: The basic technique was by the art of orchestrating warfare, nothing drives a country more in debt than warfare. The first and second world war gave the international banks vast control (the trick is to finance both sides of the war). If one carefully traces the flow of money, it leads straight to these "gentlemen". Having a position where the economy of the world could be manipulated, the international banks gain enormous profits and more control as they know (control) beforehand in which direction the economy will go.

Q five: If this is true, how is it that this "scam" is not exposed in the media?

A five: To most people international economy is incomprehensible and it is no accident that it is so. Further more most of the leading tv-networks and newspapers are being controlled (financed) by these "insiders". Hitler once said:

"The bigger the lie the more people will believe it." The truth can be so outrageous that one chooses to disbelieve it. Nobody has apparently put all the odd pieces of the puzzle together - and if somebody actually did, they for sure didn't dare print it! If anybody tried to expose the truth, they would be ridiculed for being "paranoid" or simply ignored.

Q six: Is there a link between the "insiders" and international drug traffic, the increased use of psychiatric drugs/medicine and the resulting rise of crime and social turmoil?

A six: Yes, even though it sounds incredible it is, never-the-less, the sad truth.

Q seven: What is the objective of these "insiders"?

A seven: Global control! - Fantastic as it may sound it is not a new concept; Hitler wanted it. Stalin wanted it. These guys - these "insiders" - actually have a marked degree of it already! They have gained and maintained a very significant control of the UN, and even though grossly ineffective it forms one of their primary tools of power.

Q eight: What is their future strategy?

A eight: To disarm the armies of the world and replace them with UN-forces - all done, of course, under the guise of "world peace". The horrible fact is that the crisis the UN-troops are "handling" is being orchestrated behind the scenes to increase the need for UN-intervention. Another very important part of their program is to increase the registration of information of the citizens of the world into one central computer system containing all personal data. This would give the "insiders" a complete record of potential enemies etc.

Q nine: How can this plan be halted?

A nine:

1) Make sure that you work against any type of registration of personal information, like religious and political beliefs, sexual preferences etc. You will be presented with a lot of "good reasons" for such, like the need for statistics, to furnish better help for the individual citizen etc.

-

Just don't buy it!

2) By preventing monopolies on energy. Have you ever wondered about how it can be that we still have cars running on gasoline? - Check who owns the patents on new, more economical and less polluting types of energy - the very same people who make a living by selling gasoline!

Rockefeller's fortune was made by a worldwide oil monopoly.

3) Be very suspicious of attempts to seize property by the state, this being in form of taxes or expensive bureaucracy.

4) Advocate relentlessly for the right to speak and think freely.

Q 10: Where is the evidence on all the above points?

A 10: Very seldom in the media, and yet; now that you know the ogres behind the scene, the media will make more sense to you. The evidence is well hidden but you can trace it. It's not that difficult to establish whom your country owes money to, it's a little more difficult to establish who controls the banks and who puts economic pressure on your government. If you have the courage we welcome you, if that's not for you we urge you to once a year to send this memo to 10 different people. It's the least you can do ...

Good luck
